Hi there! I'm a skilled MERN stack developer passionate about creating seamless and creative web applications. With expertise in MongoDB, Express.js, React.js, and Node.js, I bring a dedicated approach to drive innovation in projects. Let's collaborate and turn ideas into exceptional digital experiences!

Skills

Front-end Development:

- React.js
- Redux
- State management
- React developer tools
- Component Lifecycle
- Redux-Toolkit
- HTML5
- CSS3
- JavaScript (ES6+)
- UI Libraries (Tailwind, Bootstrap)
- JSON
- AJAX

Back-end Development:

- Node.js
- Express.js
- RESTful API development
- Database (MongoDB,Mongoose, SQL)
- Server-Side Rendering
- postman
- Version Control & Collaboration:
- Git
- GitHub

soft skill

- communication
- problem solving

Education

● Calicut University

- BSC Computer Science

Projects

● E-commerce Website

- Created a comprehensive e-commerce website, covering both front-end and back-end, utilizing a variety of technologies including JavaScript, Node.js, Express, Mongoose, HTML, and CSS.
- Successfully incorporated user authentication and authorization features to enhance the security and user experience.
- Seamlessly integrated a secure payment gateway to enable safe and convenient online transactions.
- view the project on GitHub for more details.([github](#))

● Ongoing Project

- Creating a social media platform with React for user-friendly design.
- Using Tailwind CSS for streamlined and responsive UI.
- Developing server-side functions with Node.js and Express for efficient data handling and storing data MongoDB
- Enhancing security and privacy with advanced user authentication and authorization.
- view the project on GitHub for more details. ([Github](#))

Mini Projects

User Management Website

- Front-End Development: Created the user management website's user-friendly interface using React for responsive.
- Back-End Development: Built the server-side functionality with Node.js and Express and MongoDB
- User Management Features: Designed an easy-to-use interface for administrators to manage user profiles.
- For security Added user authentication & role-based access control to protect data & manage user permissions.
- view the project on GitHub for more details. ([github](#))

User-Friendly Todo List Application

- Technology Stack: Developed a Todo list application using React, harnessing the power of this popular front-end library.
- Efficient State Management: Implemented robust state management techniques to ensure a seamless and organized task-tracking experience for users.
- For user-centric design created an intuitive and user-friendly interface, prioritizing user experience and ease of use.
- view the project on GitHub for more details. ([github](#))

Olx clone

- Olx clone using React ([Github](#))
- Built a clone of the OLX online marketplace using React.
- Created dynamic product listings with search, filter, and messaging features.
- Utilized Firebase services for user authentication and data management.
- Designed with responsive layout for desktop and mobile devices.
-

Netflix clone

- Netflix clone using React ([Github](#))
- Developed a clone of the Netflix streaming platform using React.
- Replicated core features and UI components for browsing and watching movies and TV shows.
- Implemented user authentication and responsive design.

Weather App (React)

- Built a Weather App in React, using an API to fetch live weather data. Designed a user-friendly interface with location-based forecasts and interactive elements. ([Github](#))

Experience

- Self-Directed MERN stack developer
- Coding Bootcamp
- Developed Ecommerce website and some mini projects
- Weekly reviews by industrial experts
